Here you will find out how popular you are, how many likes and comments you have. It allows you to increase your popularity, based on data. You can also like: 13 Best Instagram Repost Apps for Android & iOS back to the menu ! Followers on Instagram are a huge deal nowadays. People get real anxiety, they watch who followed them and didn't follow them and that people don't give them so many likes that they think their photos deserve. This is ten times more important for bloggers on Instagram because they need to track down the statistics of new subscribers and how many people sign out within a certain period of time. This app is pretty nice to these goals. This is a typical Instagram follower statistics app where you can check how many people have recently signed up for your account, how many people sign out, how many people have visited your profile without a subscription. You can see which posts were the most popular ones. Cool feature about this particular application and the one that helps it stand out from the crowd is that it provides regular reports about anonymous visitors to your site. This free Instagram monitoring app sends you a notification directly to your smartphones and alerts you to individuals who are engagement or interested in your Instagram posts. The app is only available on Google Play and is one of the most popular in this sector. The only concern that you may have is that it contains a lot of ads. See this: The top 13 multi-account management apps on the same device back in ! The main goal of Who's following you is to find out who's viewing your profile most often. Just download and open this program, and you will get a complete list of your guests. If a person is viewing your account, it will automatically be included in the guest list. Viewing this list will help you assess your popularity or the popularity of your site. The principle of this application is that it is a detailed statistic of your guests. As soon as you install the app, you'll be given step-by-step instructions on how to use it. The ability to view visitors is the main parameter of this program. We'll start with the guests link. Here you will find a list of all the people who have recently visited your profile. In this app, users are divided into two categories. Some of them are your friends. They appear in the list at the very first. A characteristic feature of these users is that below you can see the option to add as a friend or login. After them in the queue are the people who visit your profile most often. Here you will see their photos, time and date of your visit to the site. If you are interested in a particular user, then clicking on his photo you have the opportunity to get to his page. You can also view his photos, other materials or chat. In addition, you can see his friends. This will help you see if you have common acquaintances. The application constantly updates information about visitors to your site. That's why at any time you can browse the visitor list. The Who Is Tracking You app is free for Android and iOS platforms. Although it has in-app purchases. Purchases.
